

Demonstration Korea's first rice noodle factory for the disabled.  
**Grow with technology! Value of creation!**  
**Contribute with food!**

**World's First Integrated Rice Noodles  
Automated Production Plant**

## A good company for self-sufficiency, eradication of hunger, and human health. Rice Processing Leading Company "Industrialization of Large-Scale Noodles"

### Growthability

#### Device industrialization with high barriers to entry

- Rice Noodles Automatic Production Line
- Highly ripening, refrigeration and drying technique
- Powder Manufacturing Technology
- Special grinding and milling techniques

- Fully Automated and Large-Scale Rice Noodles Major Process
- Global Rice Premium Rice Noodle Production Infrastructure

Device industrialization of rice noodles  
(complete automation, large size)

**GF Global Food Corp.**

### Profitability

#### Rice processed food (rice noodle) fostered (method)

School Meal Service Rice Noodles Obligations  
Military meal obligation

for rice noodles three times a month.

Special Act on Priority Purchase for  
Persons with Severe Disabilities

Gluten-Free (Flour -> Rice Powder)

NO TRANSPAT (Ramen -> Instant Rice Noodles)

- Leading the school meal market through the enlargement of the electronic community line.
- Market competitiveness through device oxidation (30% to 50% profit margin)

Revenue per line 60 billion won (30%-50%)

# 02 Aiming at the No. 1 company in the rice noodle market, the world's fourth-largest staple.

THE AGRO FOUNDATION

**It is the world's leading company in rice noodles, the world's top four staple foods.**

Oil-fried ramen, gluten alternative food The growth potential of instant rice noodles is very high.

## Main Ingredient of Rice

Globalization of processed rice foods based on rice, the world's staple food (rice noodles are the world's top four staple foods).  
The combination of instant rice noodles and Korean ramen soup leads the world market with simplicity and taste.

## Device Industrialization

Securing high barriers to entry with large scale and price competitiveness by establishing a fully automatic line of instant rice noodles

## Southeast Asia Developing countries

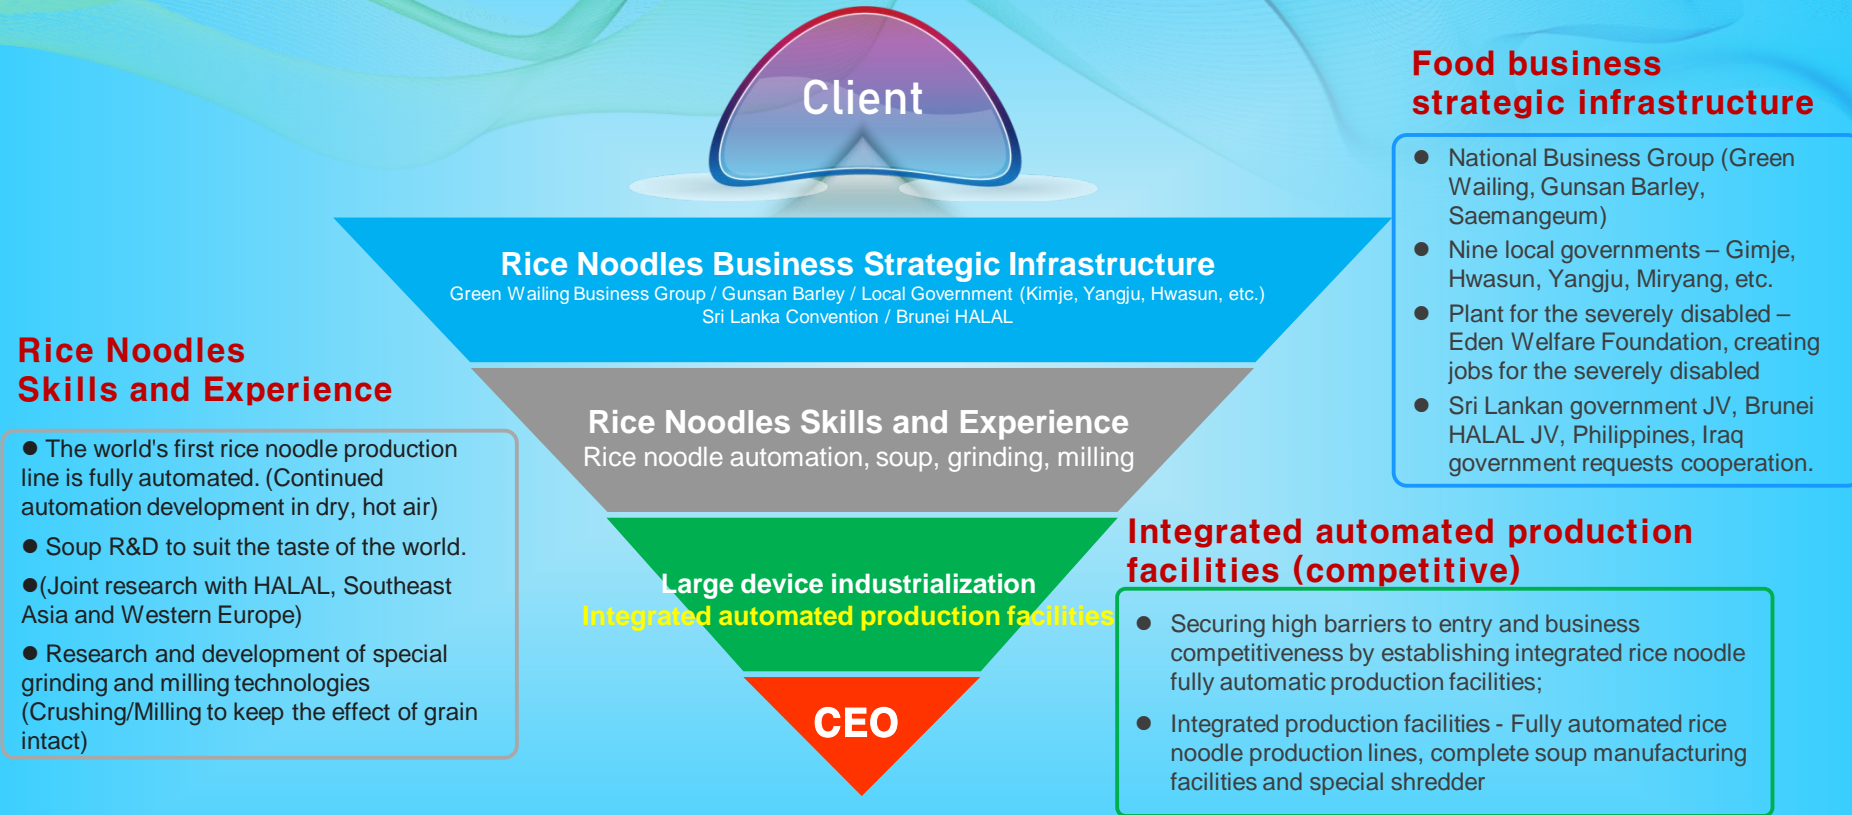

Major rice producers are emerging developing countries such as Southeast Asia, China, India, Brazil, and Nigeria, and the establishment of an electronic neighborhood based on rice processing technology will secure its status as a global rice processing food company.

The ramen market is worth 50 trillion won a year.

China 48 billion  
Indonesia 15 billion  
Japan 5 billion  
Vietnam 5 billion  
India 5 billion  
U.S.A. 4.5 billion  
Korea 3.8 billion  
Thailand 3 billion  
Philippines 2.7 billion  
Brazil 2.5 Billion  
Russia 2.1 billion  
Nigeria 1.5 billion  
...

Noodles are  
The simplicity and taste of instant rice noodles through device industrialization as the world's fourth largest staple food is "infinite growth potential."

Having strategic infrastructure for domestic and foreign food businesses through differentiated rice noodle technology and experience;

Companies that contribute to the health and well-being of people around the world.

## 2008 Presidential Commendation for Rice Processing Sector

## Myung Kyu Lee

### Personal

Age : 58 years old

Nationality : Republic of Korea
